PRODUCT DESCRIPTION

The BF GLAM series is composed of special thermoadhesive films coated with glossy polyester (PET) foil with a holographic finishing, free of PVC, plasticizers or heavy metals.

The cutting lines are highly visible, and the workability of the product is simple; its polyester adhesive carrier allows for fast weeding and easy repositioning of any small details that might have accidentally lifted from the carrier.

The blade integrity of the cutting plotter significantly determines the workability of the film.
