## INK COMPATIBILITY

AQ LAT UV

3471 SuperDry™ Greyback Roll-up Film is at the core of Sihl's pop-up display offering. The antistatic grayback coating makes the display impervious to light, preventing show-through and washed out colors. The satin microporous topcoat provides for high quality color representation and definition. The durable polyester construction is engineered to withstand repeated rolling in portable display units without tearing or edge fraying, making it the ideal media for tradeshow, retail, and other point-of-purchase displays.
